**6<sup>th</sup> Semester**

## **Internet Application Development**

### **Lab Assignment 02**

**Submitted by:**

Ali Shayan

**Submitted to:**

Irfan Hameed

**Date of Submission:**

13/02/2026

## **Problem Statement:**

Q1) Consider the Pine Valley Furniture Company database designed and implemented during the previous semester. Try to recall major relations in the database (CUSTOMER\_T, ORDER\_T, ORDER\_LINE\_T, and PRODUCT\_T).

There is a need to implement a web based solution for above mentioned database. The web based solution must incorporate following functionalities:

- i)New Customer Registration
- ii)Searching of Products
- iii)Products Selection and Order Placement
- iv)Product Catalog Update
- v)Payment Provision

As a first step design above mentioned (i) to (v) user interfaces using paper and pencil.

Next write appropriate html for creating (i) to (v) user interface prototypes.

Create links for navigation among above pages.

Design a menu using list and styles.

Add help pages for user guidance.

Either use table for layout or may opt for flow based layout.

Test user interface prototypes in browser.

Experiment with style sheets.

Q2) Try to incorporate business intelligence in your project. You may consider following options

- i)Try to transform order processing system into a customer segmentation analysis platform.
- ii)How user profiling can be added into basic order processing system?
- iii)How targeted marketing can be realized?
- iv)Add recommendation system feature in your project.
